Front-end Developer

I'm Mobin, a 20-year-old self-taught frontend developer passionate about continuous learning. My commitment to growth drives me to consistently acquire and apply new skills.

EDUCATION

Bachelor of computer engineering, BIHE University

October 2022 - Present

PROJECTS

Personal Portfolio

Crafted with pure CSS, React, and streamlined with Vite as the bundler, my personal portfolio is a dynamic showcase of my skills. This project demonstrates my proficiency in frontend development, creating a responsive and visually engaging platform to highlight my work and abilities.

Source code | Demo

Voice Assistant

This voice assistant powered by ChatGPT API. Easily control Spotify or get answers with natural voice commands. Experience fast and accurate responses for smoother digital interactions and working properly using react and JavaScript.

Source code | Demo

Birthday Reminder

In this project, I used React, Tailwind CSS, and Vite to speed up the application. These technologies not only improved performance but also helped me remember my friends' birthdays.

Source code | Demo

To-do List

In this project, I implemented a robust to-do list using React's useContext. Leveraging this feature enhanced the overall organization and functionality, ensuring a seamless and user-friendly to-do list experience.

Source code | Demo

Crypto Currency

In this project, I used a cryptocurrency API to display real-time prices, allowing users to search for cryptocurrency values effortlessly.
