EDUCATION

Bachelor of computer engineering, BIHE University

October 2022 - Present

PROJECTS

Personal Portfolio

Crafted with pure CSS, React, and streamlined with Vite as the bundler, my personal portfolio is a dynamic showcase of my skills. This project demonstrates my proficiency in frontend development, creating a responsive and visually engaging platform to highlight my work and abilities.

Source code | Demo

Voice Assistant

This project features a voice assistant powered by the ChatGPT API, allowing effortless control of applications like Spotify through natural voice commands. Experience fast and accurate responses, ensuring smooth digital interactions. Developed using React and JavaScript.

Source code | Demo

Birthday Reminder

This is a birthday reminder project crafted with React, Tailwind CSS, and Vite. Easily save and receive reminders for special events like friends' birthdays.

Source code | Demo

To-do List

Built a robust to-do list with React, utilizing Context for efficient data storage. This enhancement brings seamless organization and functionality, delivering a user-friendly to-do list experience.

Source code | Demo

Crypto Currency

Developed a project utilizing a cryptocurrency API for real-time price display, offering users a streamlined experience to effortlessly search for current cryptocurrency values.

Source code | Demo

English, Intermediate

Interests

Front-end Development

Working as a front-end developer has always been my interest. I believe in this ecosystem; there is no limit to being creative. I read the news about this topic every day and love to get updates.

Open-Source Community

I love being part of the open-source community! I enjoy working on different projects where people come together to solve real-world problems. The teamwork and shared spirit in open source keep me motivated as I learn and contribute.

Blockchain

Excited about the amazing change's blockchain can bring, even though I haven't worked with it directly. I'm eager to learn about its uses and be part of creative projects because I'm curious and passionate.

Responsive Web Design

freeCodeCamp Issued Oct 2023
